Name: __Railey Dela Peña_____   **Year & Section:** __2-IT2_____

Group Number/Project Title: __Group2 – ClickMenu: Your Carenderia Delights with Just a Click_____

Accomplishment Report

       I'm happy to share my successes the I made for our website development. Despite some challenges, I'm happy to have reached important benchmarks that improve our website.

1. **Planning Meeting for Layout**
   - To debate and prepare the new look for our website, I conducted a meeting with my members. I was able to get useful feedback despite some early difficulties with collaboration, and I went on to create layouts for important sections including the home, menu, reservation, and review pages.

2. **Resource Contribution**
   - I provided essential resources for the new website layout, ensuring that the project had the necessary tools and assets to proceed smoothly. This included graphics, images, and other materials needed for the visual elements of the website.

3. **CSS Coding for Home Page**
   - I developed CSS code for the home page, incorporating essential styling elements such as display, position, box-shadow, and more. Ensured that the design was not only visually appealing but also responsive across various devices.

4. **CSS Coding for Menu Page**
   - I implemented CSS coding for the menu page, aligning the design with the envisioned look. Prioritized responsiveness to guarantee a seamless user experience, regardless of the device being used to access the page.

5. **CSS Coding for Reservation Page**
   - I also created CSS codes for the reservation page, focusing on a minimalistic design that is both visually pleasing and responsive. Ensured that users could easily navigate and interact with the reservation features without any hindrance.

6. **Review Page Enhancement**
   - I collaborated with one of my members who contributed to the review page based on the initial layout. Merged efforts to streamline the design and user experience. Re-wrote the entire code of the review page to incorporate Bootstrap, addressing issues that arose and ensuring a cohesive and error-free design.

Challenges and Solutions:
- Faced challenges with team cooperation during the layout planning but successfully navigated through differences to create an effective and visually appealing design.
- Encountered issues with the Bootstrap implementation on the review page, leading to a rewrite of the entire code to address layout and text spacing problems.
